Contents

Propagation and scattering

O. Magnin and P. Meyrueis, Diffractive beam shaper for blood cells optical characterization 1

Y. Cai and Q. Lin, Fractional Fourier transform for elliptical Gaussian beams 7

Q.A. Naqvi and M. Abbas, Intermediate zones in electromagnetism for dielectric half-space geometry: planner observations 15

G.T. Shubeita, S.K. Sekatskii, G. Dietler, S. Takahashi and A.V. Zayats, Near-field optical microscopy of strongly scattering microporous metal/polymer membranes 23

L. De Caro, C. Giannini, S. Di Fonzo, W. Yark, A. Cedola and S. Lagomarsino, Spatial coherence of X-ray planar waveguide exiting radiation 31

M.A. Palomino-Ovando, D. Ríos-Flores and F. Ramos-Mendieta, Transit time of electromagnetic Gaussian packets traversing metallic slabs: the packet unfolding effect 47

Optical information, image formation and analysis, optical computing

P.J. McMahon, A.G. Peele, D. Paterson, J.J.A. Lin, T.H.K. Irving, I. McNulty and K.A. Nugent, Quantitative X-ray phase tomography with sub-micron resolution 53

K.R. Sayanna, D.K. Sagar and S.L. Goud, Effects of defocusing on the Sparrow limits for apodized optical systems 59

X. Ke, X. Yan, N. Srisanit, M. Wang, J. Yang, X. Huang and S. Zhong, Holographic storage in carbazole-azo binary compound doped polymer 69

E. Longueteau, L. Delage and F. Reynaud, Validation of photon noise correction using the OAST stellar interferometer breadboard 75

D. Ganotra, J. Joseph and K. Singh, Second- and first-order phase-locked loops in fringe profilometry and application of neural networks for phase-to-depth conversion 85

J. Ding, M. Tang, Z. Jin and G. Wenqi, Modified binary Gabor zone plates 97

S. Sumriddetchkajorn, Three dimensional mirror-based tunable 90° polarization rotator architectures 105

B. Liang, Z. Wang, Q. Guo, G. Fu and C.M. Cartwright, Optical switching property of a Ce:KNSBN photorefractive volume grating controlled by the readout beam polarization 111

N.K. Nishchal, J. Joseph and K. Singh, Optical phase encryption by phase contrast using electrically addressed spatial light modulator 117

J.J. Esteve-Taboada and J. García, Detection and orientation evaluation for three-dimensional objects 123

M. von Waldkirch, P. Lukowicz and G. Tröster, LCD-based coherent wearable projection display for quasi-accommodation-free imaging 133

G.H. Kaufmann, Phase measurement in temporal speckle pattern interferometry using the Fourier transform method with and without a temporal carrier 141

B. Kemper, J. Kandulla, D. Dirksen and G. von Bally, Optimization of spatial phase shifting in endoscopic electronic speckle pattern interferometry 151

Optical communications

M. Attygalle, A. Nirmalathas and H.F. Liu, All-optical coding of mode-locked semiconductor laser pulse trains for high bit rate optical communications 161

O.A. Kolevatova, A.N. Naumov and A.M. Zheltikov, Guiding high-intensity laser pulses through hollow fibers: self-phase modulation and cross-talk of guided modes 169

H. Liu, S.C. Tjin, N.Q. Ngo, K.B. Tan, K.M. Chan, J.H. Ng and C. Lu, A novel method for creating linearly and nonlinearly chirped fiber Bragg gratings 179

Z. Li, C. Lou, Y. Gao, C. Lu and C. Tee Hiang, Novel method for pedestal suppression and chirp elimination of high-order compressed solitons by using semiconductor optical amplifier and tunable filter 185

P.L. Swart, A.A. Chtcherbakov, W.L. Joubert and M.G. Shlyagin, Study of the pressure dependence of hydrogen diffusion in optical fiber by an interferometric technique 189

S. Sumriddetchkajorn, Polarization-insensitive tunable-contrast fiber-optic polarization interferometers with a polarization controller 197

J. Azaña, Time-to-frequency conversion using a single time lens 205

B. Ibarra-Escamilla, E.A. Kuzin, F. Gutierrez-Zainos, R. Tellez-Garcia, J.W. Haus, R. Rojas-Laguna and J.M. Estudillo-Ayala, Measurement of beat length in short low-birefringence fibers using the fiber optical loop mirror 211

L. Zhu, Y. Zhang, Y. Dong, M. Chen, L. Xia and S. Xie, Impact of optical (de)multiplexers on 40 Gbit/s WDM transmission system 221

S. Boscolo, S.K. Turitsyn and K.J. Blow, All-optical passive 2R regeneration for $N \times 40$ Gbit/s WDM transmission using NOLM and novel filtering technique 227

S. Cierullies, H. Renner and E. Brinkmeyer, Numerical optimization of multi-wavelength and cascaded Raman fiber lasers 233

T. Bastin and E. Solano, Population trapping in the one-photon mazer 239

M.A. Forastiere, R.M. Montereali, A. Pace, S. Pelli, M. Piccinini and G.C. Righini, Leaky modes in lithium fluoride thick films thermally evaporated on glass 249

M.A. Porras and I. Gonzalo, Control of temporal characteristics of Bessel-X pulses in dispersive media 257

Atomic and molecular physics

I. Rebane, Spontaneous emission rates of a single impurity molecule in a uniaxial host crystal 265

K.P. Unnikrishnan, J. Thomas, V.P.N. Nampoori and C.P.G. Vallabhan, Nonlinear absorption in certain metal phthalocyanines at resonant and near resonant wavelengths 269

A. Raczyński, J. Zaremba and S. Zielińska-Kaniasty, Coherent processing of a light pulse stored in a medium of four-level atoms 275

Condensed matter

M. Reha Özalp, G. Özen, A. Sennaroglu and A. Kurt, Stimulated and spontaneous emission probabilities of Tm^{3+} in TeO_2–$CdCl_2$ glass: the role of the local structure 281
